Result Driven IT Support Engineer with 3+ years of experience delivering first-line technical support in fast-paced and client-facing environments. Skilled in Microsoft 365 administration, Windows/Linux support, and network troubleshooting. Proven ability to resolve incidents via phone, email, ticketing systems, and on-site support while maintaining high customer satisfaction. Experienced in working within SLA-driven environments, prioritising tickets, and escalating complex issues appropriately. Passionate about providing excellent user support and growing within a Managed Services (MSP) environment.

Work Experience

Customer Service Supervisor | Woolworth groups

08/ 2025 – Present | Taupo

- Supervised front-end operations across **6 checkout operators (5 manned checkouts + 1 self-checkout)**, coordinating workflow and task allocation to maintain efficient service during high-volume periods
- Managed **checkout operations at primary register**, handling continuous **liquor approvals and lotto transactions** while ensuring compliance with regulatory and company policies
- Resolved customer inquiries, refunds, and on-floor issues in real time, **minimizing service delays and maintaining smooth store operations**
- Acted as primary escalation point for operational and technical issues (POS errors, transaction failures, checkout disruptions), ensuring **quick troubleshooting and resolution**
- Recognized with **“Safety Hero of the Month”** and leaderboard rankings for strong operational performance, team support, and commitment to workplace safety

Healthcare Assistant | IT Support — Steele Park Home

03/ 2024 – 05/2025 | Hamilton

- Provided patient care and support, assisting with daily activities, mobility, and hygiene
- Ensured emotional well-being of patients by offering compassionate communication and companionship
- Assisted customers (staff and patients) with basic troubleshooting for devices and applications
- Configured and maintained printers, WiFi, and basic IT equipment for smooth operations

Network Support Engineer — Tech Domain

12/ 2024 – 04/2025 | Hamilton

- Provided first-line IT support to clients, troubleshooting Windows/Linux systems, network connectivity, and user access issues
- Resolved incidents via remote support tools, ensuring minimal downtime and high customer satisfaction

- Assisted users with Microsoft 365 setup, email configuration, and VPN access
- Diagnosed and resolved desktop, software, and networking issues in a fast-paced environment
- Escalated complex technical issues to senior engineers with clear documentation
- Performed vulnerability scans using Nmap and Nessus and applied mitigation measures

Security Analyst (Job Simulation) Forage | Mastercard / DATACOM

03/2024 – 04/2024 | Remote

- Acted as a Security Awareness Analyst, **identifying and reporting system threats** to mitigate organizational risk.
- **Analyzed business areas** requiring enhanced security measures and successfully **implemented tailored training programs**.

Technical Skills

IT Support & Systems

- Microsoft 365 Administration (User Management, Exchange Online, Outlook Configuration)
- Windows & Linux System Support
- Active Directory (User Account Management, Access Control) *(add if you've touched it even a little)*
- Remote Support & Troubleshooting

Networking

- TCP/IP, DNS, DHCP, VPN Configuration & Troubleshooting
- Network Connectivity & Wi-Fi Issue Resolution

Tools & Ticketing Systems

- Jira, Freshdesk (Ticket Management, Incident Tracking)
- Remote Desktop Tools (RDP, TeamViewer or similar)

Cloud & Infrastructure

- AWS (S3, IAM, Basic Cloud Support)
- Basic System & Network Configuration

Security & Monitoring

- Vulnerability Scanning (Nmap, Nessus)
- Basic Cybersecurity & Risk Mitigation

Scripting & Web (Supporting Skills)

- Python (Basic Automation/Scripting)
- HTML, CSS, JavaScript (Basic)

Projects

Linux Administration & Security Lab – Portfolio Project

Github Link : [Github Portfolio for Linux lab](#)

- Designed and implemented a Linux administration lab environment to practice user provisioning, access control, process monitoring, and backup automation.
- Applied Linux security principles through permission hardening (chmod) and user account management (adduser / sudo).
- Automated backup tasks with Bash scripting and published the project on GitHub with full technical documentation.
- Strengthened practical system administration skills relevant to IT Support, Cloud, Cybersecurity, and DevOps roles.

Linux Security Monitoring & Log Analysis Lab

Github Link : [Github Linux Lab](#)

- Created a Linux-based security monitoring environment to analyse authentication and system logs.
- Identified privileged access (sudo) activity and reviewed authentication events for security insights.
- Generated structured security reports and documented findings using real system logs.
- Simulated basic SOC (Security Operations Center) log analysis workflow.

IT Security & Network Vulnerability Lab (Heartbleed Exploit Simulation)

- Built a virtual lab environment using **VMware, Ubuntu, and Kali Linux** to simulate real-world network vulnerabilities
- Performed vulnerability exploitation using **Heartbleed (CVE-2014-0160)** to identify risks in insecure systems
- Conducted **network scanning and analysis using Nmap**, identifying exposed services and potential attack vectors

- Documented findings and recommended **security mitigation strategies**, strengthening understanding of system hardening and risk prevention
- Developed hands-on experience in **network troubleshooting, security analysis, and system diagnostics**

Certificates

- **Forage Academy – Data Labeling Job Simulation** (Jan 2026)
- **Datacom – Cybersecurity Job Simulation** (Forage, Apr 2025)
- **Mastercard – Cybersecurity Job Simulation** (Forage, Apr 2025)
- **Service Desk, IT Asset, Service Configuration & Change Control Management** – Skillsoft (Feb 2025)
- **Microsoft Azure Fundamentals: Network Infrastructure** – Skillsoft (Dec 2024)
- **Google IT Support Certificate** – Coursera (Sep 2024)
- **Atlassian Jira and Scrum Fundamentals** – Udemy (Aug 2023)

Education

WINTEC | Master of Applied Information Technology

07/2023 - 11/2024 | Hamilton, New

Zealand Graduated with Merit
